This new, first virtual CME course from the IAS–USA combines planned presentations from the postponed courses, including Los Angeles and San Francisco HIV update courses. We have shortened the program and narrowed down the topics to the key issues on which most of you are likely focusing, as we know it is difficult for you to dedicate an entire day to participate in a virtual course during this time. We will cover other topics related to comorbidities, issues in aging, and so on in our COW webinar programming (https://www.iasusa.org/activities/webinars/upcoming-webinars/), which you can access live or on demand.

Though the timing is to accommodate our West Coast audience, the course will be open to everyone. We will have a virtual course for the East coast in early July. Check the IAS-USA website regularly for details.

**West Coast Course Cochairs**

Monica Gandhi, MD, MPH, University of California San Francisco  
Robert T. Schooley, MD, University of California San Diego

**Course Topics List**

**Monday, June 29, 2020**

10:00 AM – 3:15 PM
